PROJECTS :

1.Smart Attendance System -

Description: A Smart Attendance System automates the tracking of presence using advanced technologies like biometrics, facial recognition, or RFID to ensure absolute accuracy and prevent proxy attendance. It streamlines administrative operations by providing real-time data integration, effectively eliminating manual errors and simplifying payroll or academic reporting.

2.Personal Expense Tracker -

Description: A Personal Expense Tracker is a financial management tool that records and categorizes daily income and expenditures to give you a transparent, real-time view of your cash flow.

It promotes financial discipline by analyzing your spending habits, helping you stick to a budget, and identifying areas to save money for long-term goals.

EDUCATION:

Pre-University (PU)

[MASTERS PU COLLEGE], [HASSAN].

Year of Completion: [2023] Stream: Science

BE IN COMPUTER SCIENCE

[MALNAD COLLEGE OF ENGINEERING], [HASSAN],.

Year of Completion: [2027]
